

Naming Scheme for Gene Set Files

Filename pattern	Principal Nodes	Interactors Nodes
<code>*all_genes.</code>	All genes in the dataset	All interactors
<code>*all_genes_mut.</code>	All genes in the dataset	Only mutated interactors
<code>*only_mutated.</code>	Only mutated genes	All interactors
<code>*only_mutated_mut.</code>	Only mutated genes	Only mutated interactors
<code>*precog.</code>	All Precog genes	All Precog interactors
<code>*precog_mut.</code>	All Precog genes	Only mutated Precog interactors
<code>*only_precog.</code>	Only Precog genes	All Precog interactors
<code>*only_precog_mut.</code>	Only Precog genes	Only mutated Precog interactors

Table 1: Interpretation of dataset filenames: definition of principal genes and their interactors.
